

A.O. Smith Daisy Plus

A technology that protects both your water and environment...

Reducing waste water by 56% thanks to its patented eco-conscious membrane technology, Daisy Plus helps to protect the environment while providing you with delicious potable water free from harmful substances.

A.O. Smith offers "A Comprehensive Savings Package" to our customers with Side Stream Membrane Technology.

More	%66	pure water
Less	%56	waste water
Prolong	1.5times	of RO filter

Daisy Plus looks out for nature while purifying your water.

Ordinary purification devices waste three glasses of water during purification, but this is limited to only one glass with Daisy Plus thanks to A.O. Smith's patented Side Stream Membrane Technology. The patented membrane technology feature means that Daisy Plus lasts 1.5 times longer than its peers. Daisy Plus has thus been designed to lower consumers' carbon footprints and support a more sustainable world.

Know when to change the filter with performance follow-up...

Daisy Plus Performance Follow-up Monitor (PFM) keeps you in the know by showing you its operating status and when its filter needs changing.

This means that you're in control and you don't change your filter unnecessarily early. Your water will always be clean and fresh as you'll know exactly when to change the filter.

An electronic faucet that warns you when the filter needs changing...

Another important feature of Daisy Plus is that it has an electronic faucet. The Performance Follow-up Monitor (PFM) gives filter change warnings and indicates the operating status of the device via the electronic faucet. This means that your water is always fresh.

Remove harmful substances with superior filtration technology

Multi-phase filtration technology removes 99.9% of the heavy metals, agricultural chemicals, bacteria, viruses and other harmful substances that can be in your water. Satisfy both your thirst and peace of mind when you drink a glass of water.

Innovation has a name.

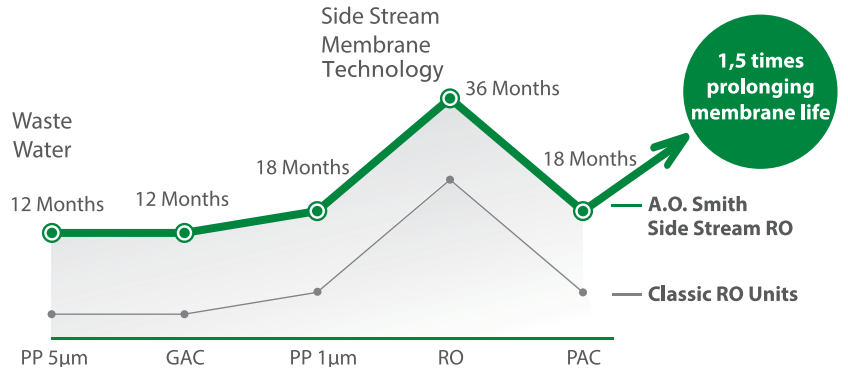

Daisy Plus

System Features

- Compact and elegant design
- Patented Side Stream Membrane Technology
- Smart e-faucet
- 75 GPD (280 Lt./day) Capacity
- 2.5 G (9.5 lt.) capacity inside cabinet Storage Tank
- User friendly Blue and Green LED display
- Status Indicators (Working, Water Source, Water Tank Full, RO Membrane and Filters' Replacement)
- Leakage Sensor and Alarm
- Lack of Water Protection and Alarm
- PCB Control Auto-flush
- Low electric consumption (25W)
- 230 V AC 50 Hz Transformer
- Dimensions: 270x410x420 mm
- Net Weight: 11 kg
- Appropriate for Municipal Water

FILTER STAGES IN DAISY PLUS SYSTEM

STAGE	CARTRIDGE FILTERS	EXPLANATION	6-12 M	12-18 M	24-36 M
1	5 µm Sediment Filter	This stage filters rust, sand, other larger particles and solid impurities suspended in the water.	✓		
2	Granule Active Carbon Filter	GAC filter effectively absorbs chlorine, mould, disinfection by-products, odors, discolorations and other materials in the water.	✓		
3	Composite Filter	This filter further removes smaller particles, suspended solids, colloids, etc. within the water.		✓	
4	Side Stream R.O. Membrane Filter	It can effectively remove bacteria, viruses, heavy metals, pesticide residue, and other harmful substances and realizes microbiological and chemical purification			✓
5	Post Active Carbon Filter	This filter regulates the taste and smell of water and keeps the water fresh.		✓	

Accessories

- 5 m. long ¼" White hose
- 1 pcs. Membrane Housing Wrench
- Fittings
- Smart e-faucet
- User Manual

Filter Life Indicators on LED Display

Filter Life Indicator on E-Faucet

- Filter usage can continue normally.
- Filter should be changed soon.
- System should be stopped, Filter should be changed immediately.
